

## **How we used AI in our project**

**I used the AI [Chatgpt]tool to help me understand and complete HTML topics in the assignment I asked the AI to explain each concept in a simple and clear way, and it guided me , I used it to:**

- **explain how breadcrumb navigation works and how to create it in HTML**
- **understand the <marquee> element and how to highlight text**
- **learn <br><br> tags and how to use them correctly**
- **learn how to copy the page path for links inside the breadcrumb**
- **create a correct colspan inside table elements**
- **make a rating input using HTML form controls**
- **build the registration form using labels, inputs and fieldsets**
- **understand how to structure forms and use semantic HTML**
